

Approximate extent of Maen Hir Central

**Representative Viewpoint 17 (Left) - Public footpath LANNERCH-Y-MEDD|25/024/3 near Meinir Farm to south of Llyn Alaw**

**Existing View**

This view is representative of walkers using the public footpath 25/024/3 on the slopes to the south of Llyn Alaw and to the north of the farm at Meinir. The viewpoint is located approximately 1.9km to the south of Maen Hir Central on a public footpath and farm track which links Llanerch-y-medd to Llyn Alaw. The foreground comprises a raised bank or cloddiau field boundary which borders the farm track with a gappy hedgerow beyond. The midground view stretches across the geometric pastoral fields bordered by short hedgerows which slopes towards Llyn Alaw. The background comprises the rising land beyond Llyn Alaw, on which sits further geometric pastoral fields with smaller blocks of woodland and isolated properties and farms interspersed throughout the landscape. The Llyn Alaw Wind Farm is visible in the distance with several wind turbines located on the skyline.

**Operation Phase**

Maen Hir Central would be partially visible on the far side of Llyn Alaw in the distance. To the left of the view, the solar arrays would be visible near Fferam-gyd and Tyddyn Bach. The proposed 132kV substation in Field 87 may be perceptible to the right of Tyddyn Bach. To the centre left and centre right of the view, the Solar PV Site would be seen to the north of the south-facing slopes to the north of the reservoir. At the point where Llyn Alaw can no longer be seen, fields which are potential locations for the Project Substation and BESS would be partially visible. During the operation phase, the scale of effects are likely to be **Small** (adverse) prior to and once the embedded mitigation has established.
