

Representative Viewpoint 23 (Left) - Rural lane near Mynydd Mwyn Mawr to south of Llanerch-y-medd **Existing View**

This viewpoint is semi-elevated and located approximatley 2.1km to the west of Maen Hir South 'B' and is representative of motorists using of a rural lane near the summit of Mynydd Mwyn Mawr to the south of Llanerch-y-medd. To the left, the view is obscured by mature hedgerows in the foreground, while the foreground to the right of the view comprises a large pastoral field which slopes to the east. To the right, the view opens up beyond the foreground, revealing geometric pastoral fields bordered by short but robust hedgerows on a gently sloping landform. Isolated properties and farms are visible within the landscape. There is a higher concentration of woodland and hedgerow treecover in the background of the view in the context of Maen Hir South 'B' to the east of the viewpoint.

Operation Phase

Maen Hir South 'A' woud not be clearly perceptible from this viewpoint due to the intervening hedgerows and scrub to the left of the foreground view. The higher sections of Maen Hir South 'B' to the right of the view would be perceptible including the potential location of the proposed 132kV Substation. During the operation phase, the scale of effects are likely to be Small (adverse) reducing to Negligible (adverse) once the embedded mitigation has established.
